

OSC 997ST013 Filtration Glass Set

<Features>

Filtration glass set is an unique collocation which combines a funnel and an innovative magnetic suction bottle (1000ml) with drain and magnet plate firmly held by a stable base.

OSC 997ST 013A	OSC 997ST 013B	OSC 997ST 013C
*Magnetic funnel(300ml) *Magnetic suction bottle (PYREX 1000ml) with drain *Holding base	*#316 Stainless steel funnel(100ml) *Magnetic suction bottle (PYREX 1000ml) with drain *Holding base	*Glass funnel(300ml) *clamp *Suction bottle (1000ml)
For general filtrations such as suspended solid test	For some filtrations requiring rapid sterilization such as organism test	For sample pretreatment or refining solution used in HPLC, GC, AA analysis

OSC 997ST014-017 Vacuum Filtration Collocation

<Recommended set available with vaccum pump>

OSC 997ST 014	OSC 997ST 015	OSC 997ST 016
*OSC 997ST013A glass set *OSC 997ST 007A vaccum pump *High pressure hose *PTFE disc filter	*OSC 997ST 013B glass set *OSC 997ST 007A vaccum pump *High pressure hose *Torch burner *PEFE disc filter *Pall GN-6 Metriceal membrace filter (200/pk)	*OSC 997ST 013C glass set *OSC 997ST 011A vaccum pump *High pressure hose *PTFE disc filter
General purpose filtration	Special for organism test filtration	For sample pretreatment or solvent refinement

OSC 997ST 017
*OSC 997ST 011 system *Pall type A/E glass filter
Special collocation for suspended solid test
